Re: Advanced Cosmetic Procedures - Removal of Mole(s)

I have been requested by your Patient,

Patient's Name

to carry out cosmetic removal or reduction of mole(s) on the patient's face/body by using Advanced Electrolysis (thermology method).

I am fully qualified, insured, experienced practitioner and lincensed by Manchester City Council to carry out Advanced Electrolysis treatments.

The Client has been advised to seek GP's approval for this procedure.

The contraindications for thermolysis treatment include pacemaker, epilepsy, blood thinning medications, hypertension. Diabetes is semi-contraindicated due to the lack of sensation and slower healing process. It does not, however, affect the blood sugar levels.

Kindly confirm on the slip below whether the Patient is suitable for this treatment.

Yours faithfully,

L Jepson

Lyuda Jepson, Advanced Cosmetic Procedures Practitioner
L-Formula Clinic, World of Difference Ltd, 4 Linden Rd, Manchester M20 2QJ.
